Regina Unsworth

Regina Unsworth Retirement Celebration Is On September 5

Congratulations to Shepherdian, Regina Unsworth, who is retiring after 30 years with the Veterans Administration..

We would like to help her celebrate this special occasion on Sunday, September 5, at 6 pm in the Fellowship Hall.

If you would be willing to provide some "finger food" for the celebration, there is a sign-up sheet in the Church foyer. Dessert will be provided.

Just Thinking -- I'm frustrated!!! Really, I-am-frustrated. My office computer crashed this week and the technician confirmed my diagnosis; that "puppy" was dead. I had to reload Windows, and all of the software. You're talking about days of work. The bad part is that some of the stuff cannot be retrieved. Fortunately, we have an on-line backup service and a good portion of the data was saved.

That's the good news! After reformatting and loading the software for 4 days, it is trying to crash again. My forecast for the future is a new computer. Meanwhile, I am writing you on the old one, which is on life-support. It's really hard to type with your fingers and toes crossed.

Life gets that way at times; things happen, over which we have no control. Damage is done. We try to deal with the issues, but nothing we do seems to make it right. The good news, in this case, is that we have the most reliable backup there is...Jesus Christ. He might not choose to repair the damage, but he helps us deal with the losses. *Jesus said, "Don't let your hearts be troubled. Trust in God, and trust in me. (John 14:1 NCV)*

I will survive, even if my computer doesn't; see you in Church and Sunday School.

Missionary Reading Books Are available to be checked out in the Church foyer.

**You may check out a book for
reading or on CD for two
weeks by signing the sheet for
the book or CD.**

**Please read or listen to all of the books and
return them on time, so everyone will have
a chance to read them this year.**

Thank you

Finally — Speaking of computers, a recent study by some university tried to determine if computers were male or female.

The men in the group decided that they were female because: 1) No one but their creator understands their internal logic; 2) Even the smallest mistake is stored in long-term memory for possible later review; 3) As soon as you commit to one, you spend half your paycheck buying accessories for it.

The women concluded that computers were male because: 1) They have a lot of data, but still can't think for themselves; 2) They are supposed to help you solve problems, but half of the time they are the problem!
